

3D Graphics Software Engineer

Looking for a new challenge? Want to help drive the Vulkan API standard forward in the industry? LunarG is looking for talented 3D graphics software developers to help us deliver world-class, 3D graphics solutions. What do we mean by that? We create and troubleshoot graphics drivers, developer tools, SDKs, and Vulkan and OpenXR ecosystem components for the game console, desktop, and mobile markets.

LunarG is an independent, software consultancy that will provide you with the opportunity to work on an interesting variety of technologies. Our projects range from open source to proprietary, working with a wide range of clients across the game development, AR/VR, medical, and GPU markets. Many of our projects support open standards from Khronos and provide the satisfaction of contributing to and supporting Khronos open standards.

We pay competitively with strong bonuses. Our company culture is an environment that fosters teamwork and collaboration. LunarG strives to shed itself of large-company overhead and inefficiencies that don't provide direct value to our business, clients, and employees. There is transparency from management and employee participation in decision making.

All positions can be 100% remote, on-site, or hybrid.

If the following postings spark your interest, please contact Karen Ghavam at jobs@lunarg.com. We look forward to hearing from you!

3D Graphics Software Engineer Job Description

This position description is for a 3D Graphics Software Engineer. ***For more experienced candidates, see the additional information about our Senior 3D Graphics Software Engineer job posting later in this document.***

Required Education, Skills, and Experience

- **Education**
 - Bachelor or Master degree in Computer Science, Computer Engineering, or a related engineering field
- **Skills and Experience**
 - 3+ years of development experience or master-level, computer-graphics-focused study
 - Familiarity with 3D graphics APIs (e.g. Vulkan, OpenGL, OpenGL ES, Direct3D 12) and GPU architectures

- C++ knowledge and experience
- Scripting, source code control, and build tools proficiency (e.g. Bash, Python, CMake, Git)

Wanted Skills and Experience

- Graphics drivers
- Optimizing/tuning graphics drivers, shader compilers, shaders with hardware acceleration
- Compilers, including optimization and compiler front-end methodologies (e.g., LLVM, SPIRV-tools, glslang)
- Familiarity with shader languages (e.g. SPIR-V, HLSL, MSL, GLSL)
- Familiarity with CPU architectures
- Development on multiple platforms (Linux, Windows, and macOS)
- Open source development tools and methodologies
- Continuous Integration solutions and methodologies

Salary

- Colorado employees: \$91K - \$125K and bonus program
- Non-Colorado employees: competitive compensation and bonus program

Benefits Package

- Flexible schedule
- Paid time off, company holidays
- 401K for US-based employees
- Medical, dental, vision insurance for US-based employees
- Disability insurance for US-based employees
- Life insurance for US-based employees

Senior 3D Graphics Software Engineer Job Description

This position description is for an experienced Senior 3D Graphics Software Engineer. ***For less experienced candidates, contact us about LunarG's 3D Graphics Software Engineer job posting.***

Required Education, Skills, and Experience

- **Education**
 - Bachelor or Master degree in Computer Science, Computer Engineering, or a related engineering field
- **Skills and Experience**
 - Technical skills
 - 5+ years of development experience or master level computer-graphics-focused study

- Familiarity with 3D graphics APIs (e.g. Vulkan, OpenGL, OpenGL ES, Direct3D 12) and GPU architectures
 - C++ knowledge and experience
 - Scripting, source code control, and build tools proficiency (e.g. Bash, Python, CMake, Git)
 - Demonstrated Leadership skills
 - Ability to manage projects/customer interactions without supervision
 - Ability to identify needs/problems/opportunities to innovate within internal/external environments, set direction, and identify actions that move the team forward.
 - Ability to influence/coach/mentor others
- **Wanted Experience**
 - Graphics drivers
 - Optimizing/tuning graphics drivers, shader compilers, shaders with hardware acceleration
 - Compilers, including optimization and compiler front-end methodologies (e.g., LLVM, SPIRV-tools, glslang)
 - Familiarity with shader languages (e.g. SPIR-V, HLSL, MSL, GLSL)
 - Familiarity with CPU architectures
 - Development on multiple platforms (Linux, Windows, and macOS)
 - Open source development tools and methodologies
 - Continuous Integration solutions and methodologies

Salary

- Colorado employees: \$112K - \$180K and bonus program
- Non-Colorado employees: Competitive compensation and bonus program

Benefits Package

- Flexible schedule
- Paid time off, company holidays
- 401K for US-based employees
- Medical, dental, vision insurance for US-based employees
- Disability insurance for US-based employees
- Life insurance for US-based employees
